

# 1 in 20

Your chances of getting colorectal cancer.

You have about a 1 in 20 chance of developing colorectal cancer at some point in your life. Colorectal cancer is the second-leading cause of cancer-related death. But it doesn't have to be. If caught early, it is among the most curable cancers.

If you're over 50, schedule a screening with your doctor now. Don't wait for symptoms to occur.

Your doctor will tell you whether a simple at-home FIT test or colonoscopy is appropriate. Financial help may be available.

**GETSCREENEDSD**  
Stop Colorectal Cancer.
