Eat your Colors

How many red fruits/vegetables can you name? (Strawberries, cherries, raspberries, watermelon, tomatoes, red peppers, radishes, beets, and red potatoes.) Red fruits and vegetables help maintain a healthy heart and memory function.

Strawberries provide four additional health benefits. Potassium for healthy muscles, vitamin C for a healthy immune system, fiber for healthy digestion, and antioxidants for healthy bodies.

Produce Tips

- Strawberries are picked at their peak of freshness. They do not ripen after harvest.
- Choose berries that are bright red, have a natural shine and green caps that look fresh.
- Store unwashed berries in the fridge.
- Before serving, use cool water to rinse berries while the green cap is attached.
- For best flavor, allow berries to reach room temperature before serving.
